## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claims 27 and 28 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification does not enable one skilled in the art to make the claimed invention with an elastomeric body comprising a formed in place gasket.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 – 7, 9, 17 – 20 and 22 – 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gidumal (US 6,296,691).

With regards to claims 1, 2, 9 and 26 – 28, Gidumal teaches a data storage device comprising a housing (Figs. 2A and 2B, Item 19); a disc stack assembly (Figs. 2A and 2B, Item 12) rotatably mounted to the housing, wherein the rotation of the disc

stack assembly creates a fluid flow region proximate to the disc stack assembly; and an airflow guide (Figs. 2A and 2B, Item 11) that projects into the housing and comprises an elastic wall in the fluid flow region of the disc stack assembly and the elastic wall having an elastic surface (Col.6, Line 57 – Col.7, Line 21); but fails to disclose wherein the elastic wall is an elastomeric damping material.

The Examiner considers that it would have been an obvious matter of design choice to employ an elastomeric damping material as the elastic wall because it is well known in the art of acoustics to employ elastomeric damping material as vibration dampers; additionally, it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

With regards to claims 3 – 7 and 17 – 25, Gidumal teaches the limitations described in the claims (Figs.1A – 8; Col.6, Line 57 – Col.9, Line 35).

### ***Response to Arguments***

3. Applicant's arguments filed on March 20, 2007 have been fully considered but they are not persuasive. The Examiner considers that the patent to Gidumal teaches the limitations described in the claims as discussed above, and that the use of a predetermined suitable material is an obvious matter of design choice.

***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
